## ABOUT ME

---

Full Stack Developer with 1+ years of experience building secure, scalable, high-performance web applications using Laravel. Skilled in backend architecture, responsive frontends, MVC patterns, database design, real-time features, and API integration. Write clean, maintainable code and manage smooth deployment workflows. Leverage AI tools to accelerate development and improve code quality in collaborative environments.

---

## EXPERIENCE

---

**Codart Technologies (Pvt) Ltd** 12/2024 – 02/2026

*Full Stack Developer*

- Developed full-stack Laravel applications, managing backend architecture, database schemas, APIs, and responsive frontends.
- Implemented background jobs, queues, and real-time features to improve system performance and user interactivity.
- Integrated third-party APIs and deployed applications to production environments with optimized configurations.
- Leveraged AI tools like Cursor AI and Claude Code to accelerate development and improve code quality across the stack.

**Internship from Punjab Information Technology Board (PITB)** 12/2022 – 02/2023

*Full Stack Developer*

- Completed a full-stack internship; gained strong foundations in ACID, SOLID principles, OOP, PHP Laravel, API development, and Git-based team workflows.
